SKILLS

- Leadership and Collaboration: Leading cross-functional teams, stakeholder management.
- Product Management: Product roadmap, Agile, Sprint Planning, Backlog management, Data Analysis, Storytelling using data analysis and visualization, Solutions' feasibility & value proposition for the clients
- Programming & AI: Python (Pandas), GenAI (LangChain, OpenAI, RAG), NLP (MUSE, Transformers), ML (sklearn, XGBoost).
- Cloud & Data: AWS (S3, SageMaker, IAM), Databricks, Snowflake, API Integration (Reltio, SERP), SQL.
- Product & Automation: Technical Product Roadmap, Agile/Sprint Planning, JIRA, Workflow Orchestration (n8n), VSM (Value stream mapping)

EDUCATION

- UG: Bachelor of Technology (CS), Jaypee Institute of Information Technology, Noida; 2017
- XII / X: Halwasiya Vidya Vihar, Bhiwani; 2013 -2011

PROFESSIONAL SUMMARY

Technical Product Lead with 8 years of experience building Cloud-native AI products and ML solutions. Expert in architecting Python-based GenAI and NLP systems on AWS, transitioning complex business logic into scalable digital products

WORK HISTORY

SRM Technologies - Associate Project Manager Bengaluru • (Feb 2025- Current)

- Improved warranty eligibility checks by 30% for data validation of manufacturer JAN/EAN codes, Architected Python-based GenAI solution using LangChain & OpenAI to automate and deployed via AWS to handle 200K+ products
- Led feasibility research to evaluate LLMs for medical entity extraction for a Pharmacovigilance intake engine, using Python LangChain/RAG and OpenAI prototype that extracted structured medical data from unstructured clinical PDFs

ZS Associates - Senior Consultant Gurugram • (Apr 2018 - Feb 2025)

- Customer Research Tool - Product Lead: Orchestrated the end-to-end deployment of the CRT application across multiple clients reducing revenue leakage for chargeback failures in ModelN system, achieving a 90% reduction in data validation. Led design and engineering of automated data pipeline to automate customer data extraction from public domains, Integrated SERP API for web-scraping and Reltio API, implementing data triangulation logic to validate HCP identities across disparate datasets. Developed custom complex business rules for customer assignment and automated reporting delivery via SMTP/Email integration
- Intelligent Automation Product Lead - Generated \$6M+ by designing and deploying Extract.AI i.e. Automated Financial Reporting & Data Reconciliation tool. Developed AI-driven invoice and contract document processing tool using Azure AI Document Intelligence API, Databricks notebooks & AWS EC2 orchestration that reduced costs by 30% & time by 70%.
- AI Call Value Optimization Solution: Developed and executed prototype that assess HCPs and Reps conversations, an end-to-end Python pipeline using AWS Transcribe for speech-to-text and AWS Comprehend for initial entity recognition to analyze HCP-Rep interactions, deployed a prototype leveraging the Google model to assess conversation quality through high-dimensional vector similarity. Executed HCP engagement analysis by defining technical KPIs that resulted in annual savings of \$3M+ through optimized sales strategies.
- Lead an Intelligent Digital Data Workforce solution. Orchestrated the discovery and implementation of matching datasets, yielding a 300% increase in duplicate identification through automated ML-driven inference by advanced feature engineering for record linkage, including phonetic matching and string distance metrics to identify duplicate HCP/HCO profiles. Developed and tuned an XGBoost classification model to predict match probability, achieving over 95% confidence accuracy in entity resolution. Managed the product from conception through VSM (Value stream mapping) to design, build, release, analysis & iteration. Conducted 15+ RPA feasibility assessment, VSM for creating MVP different customer personas.
- Multi-Country sales load & reporting RPA implementation Streamlined process for feasibility assessment, orchestrating Unix scripts and email automation via python, Executed RPA for end-to-end Sales data reporting which involves managing complex 33+ Saved \$280k annually, surging data accuracy from 76% to 98% to maximize customer satisfaction with reduction of 6 FTE.

CERTIFICATIONS

Certified SAFe 6 Practitioner, AWS Certified Cloud Practitioner (CLF-C01), Automation Anywhere Certified Master RPA Professional v11
